Forecast for Saturday 06 Aug 2022

Weather: A cool start to Saturday underneath largely clear skies. The risk of some mist and fog patches forming in the valleys through the early hours but quickly clearing after dawn. Staying dry throughout the day with prolonged periods of strong sunshine. Some higher-based cloud may turn the sunshine hazier at times. Some late sunshine for the evening with clear intervals into the night.

Chance of cloud-free hill tops above 600m: 90% or greater.

Low cloud and visibility: Isolated mist and fog patches in the valleys will lower visibility to poor during the early hours. Cloud will be largely above the summits, though isolated patches around 800m may temporarily shroud the highest summits. Otherwise, visibilities will largely be excellent with clear views of distant hills.

Meteorologist's View

A great day to be out on the hills. UV levels will be high so be sure to wear appropriate skin protection.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:

Forecast for Sunday 07 Aug 2022

Weather: Staying dry throughout Sunday. Widely clear skies through the early hours with mist and fog patches possible forming in the valleys – though again clearing soon after the sun is up. Cloud developing a bit more for late morning, though still with sunny intervals and these becoming more prolonged again into the afternoon. Clear periods remaining into the night.

Maximum wind: 7mph northwesterly winds on the hills.

Chance of cloud-free hill tops above 600m: 90% or greater throughout the day.

Low cloud and visibility: A little mist may reduce visibility in valleys under early clear skies. Cloud largely remaining above the summits, though the small chance of it dropping to the higher summits at 800m. Nevertheless, visibility will largely be very good.

Temperature: **Valleys:** Plus 9 Celsius, rising to plus 21 Celsius.
At 600m: Plus 10 Celsius, rising to plus 24 Celsius.
Freezing level: Above the summits.
